Phase 2 – Milestone 1 Submission

Overview

This document summarizes the delivery of **Phase 2 – Milestone 1 (Setup & Data Integration)**. The goal of this milestone was to establish a usable execution workspace connected to Phase 1, without introducing automation or execution decisions.

Scope of Milestone 1

The following capabilities are included in this delivery:

- Phase 2 execution application, logically connected to Phase 1
- Automatic creation of execution workspaces for approved Phase 1 properties
- Manual execution stage tracking
- Due diligence checklist implementation
- Checklist progress tracking
- Read-only execution cost summary based on Phase 1 assumptions
- Phase 1 underwriting snapshot preserved as reference

No contractor workflows, approvals, automation, or financial overrides are included in this milestone.

1. Execution Property List

Description:

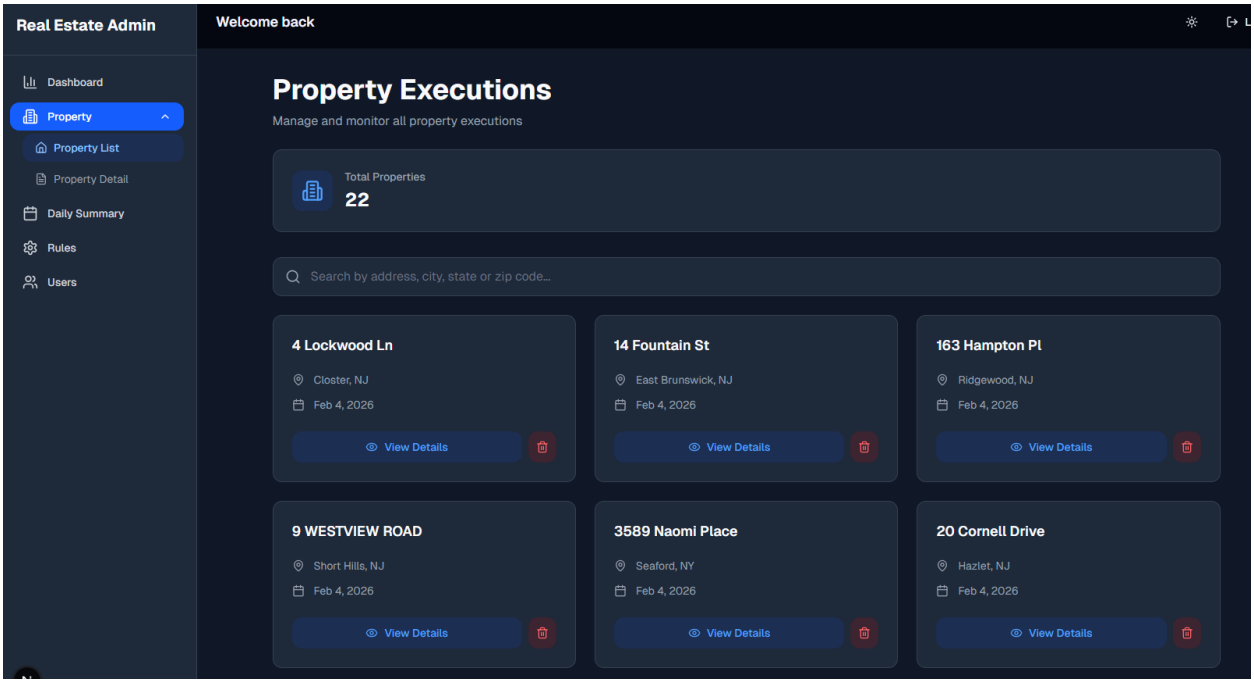
A list of all properties that passed Phase 1 underwriting and were transitioned into Phase 2 execution.

Key Points:

- Properties originate only from approved Phase 1 deals

- Each property has its own execution workspace
- Read-only overview access

Screenshot:



2. Execution Detail View

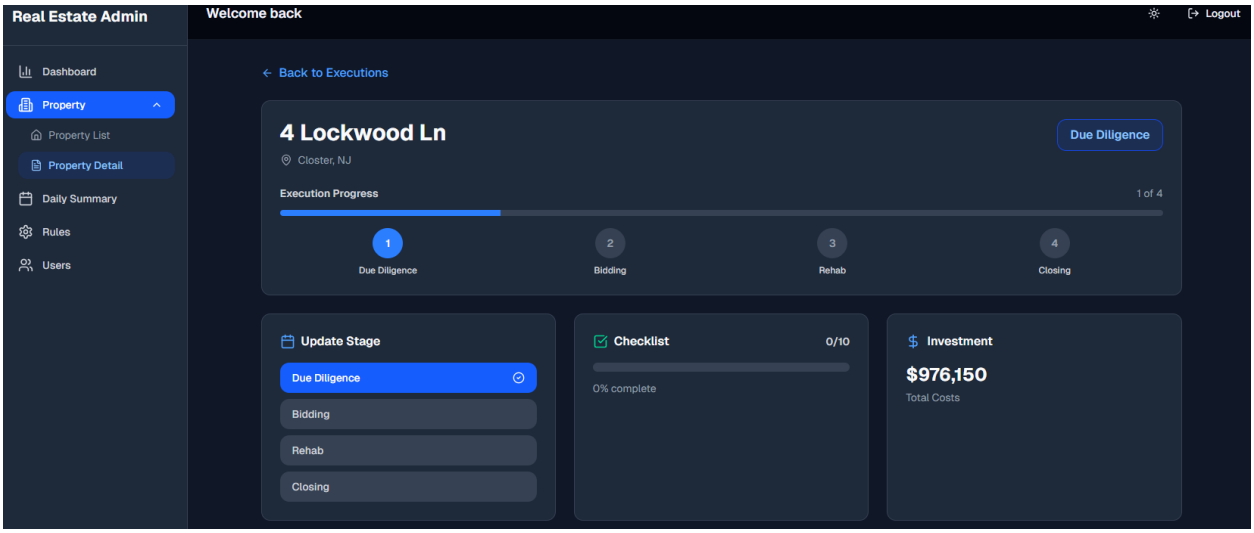
Description:

Detailed execution workspace for a selected property.

Key Points:

- Property address and location details
- Clear indication of current execution stage
- Manual stage control (human-driven only)

Screenshot:



3. Execution Stage Tracking

Description:

Execution stages are tracked manually through the UI.

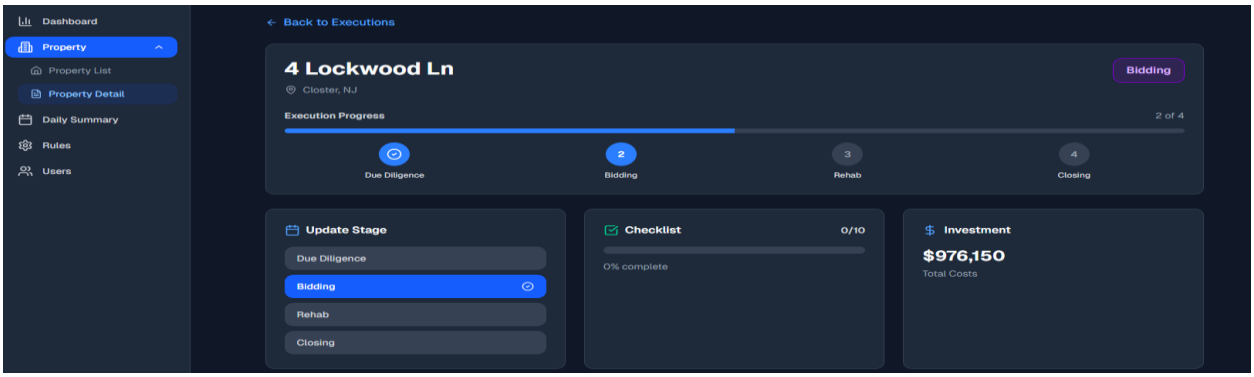
Stages Included:

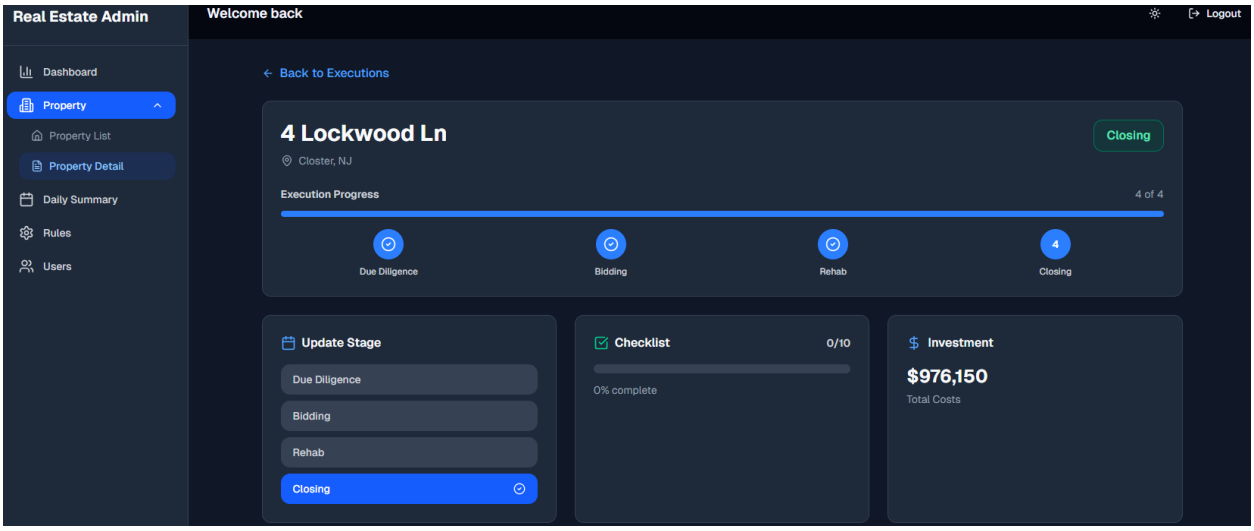
- Due Diligence
- Bidding
- Rehab
- Closing

Key Points:

- Stage changes require explicit user action
- No automated transitions
- Stage persists across sessions

Screenshot:





4. Due Diligence Checklist

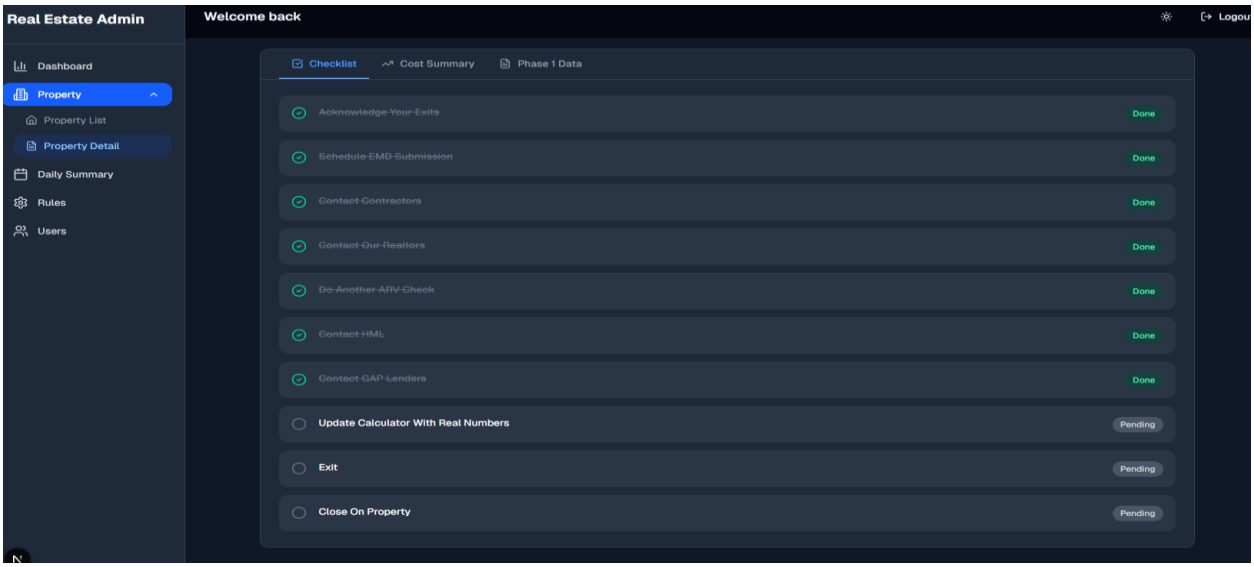
Description:

A structured, trackable due diligence checklist per property.

Key Points:

- Checklist items are stored per execution workspace
- Items can be completed in any order (concurrent)
- Each item tracks completion status

Screenshot:



5. Checklist Progress Tracking

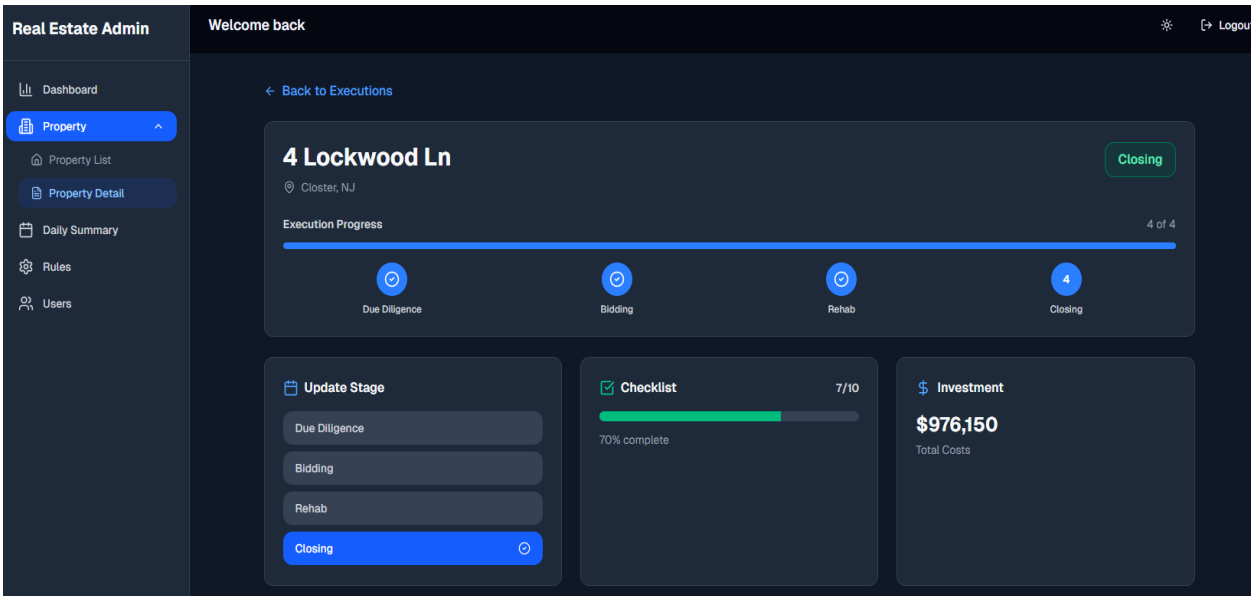
Description:

Visual progress indicator based on checklist completion.

Key Points:

- Progress is calculated as completed items / total items
- Updates instantly as items are checked
- Progress is derived (not stored or automated)

Screenshot:



6. Execution Cost Summary (Read-Only)

Description:

A structured summary of financial assumptions carried over from Phase 1.

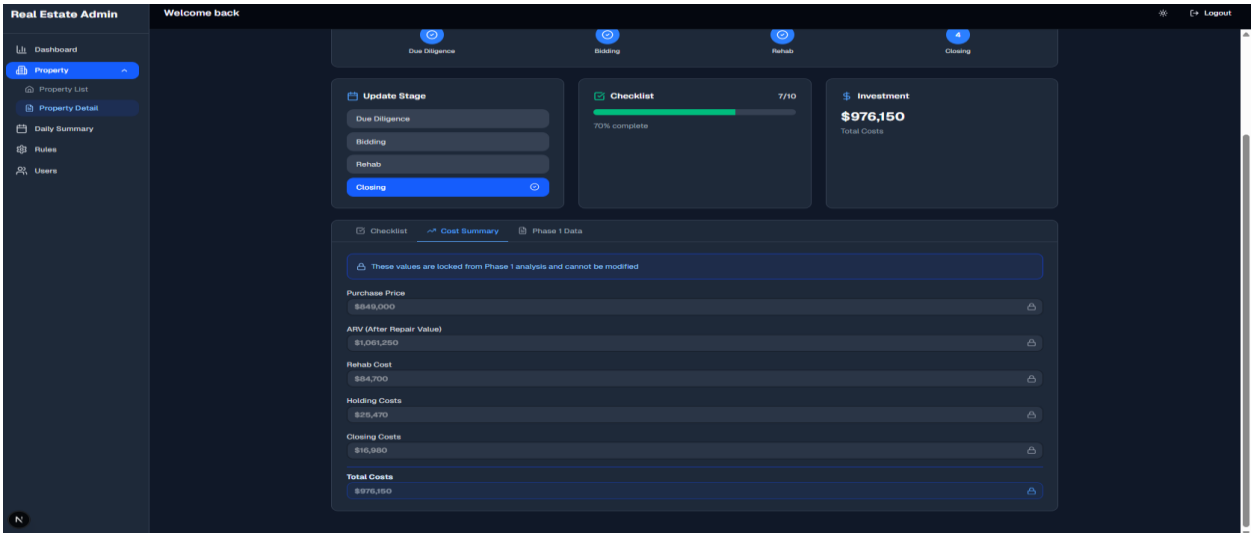
Fields Displayed:

- Purchase Price
- After Repair Value (ARV)
- Estimated Rehab Cost
- Holding Costs

- Closing Costs
- Total Investment

Key Points:

- Data is sourced directly from Phase 1 snapshot
- Read-only reference (no edits in Milestone 1)
- Ensures consistency with Phase 1 underwriting
- **Screenshot:**



7. Phase 1 Snapshot Reference

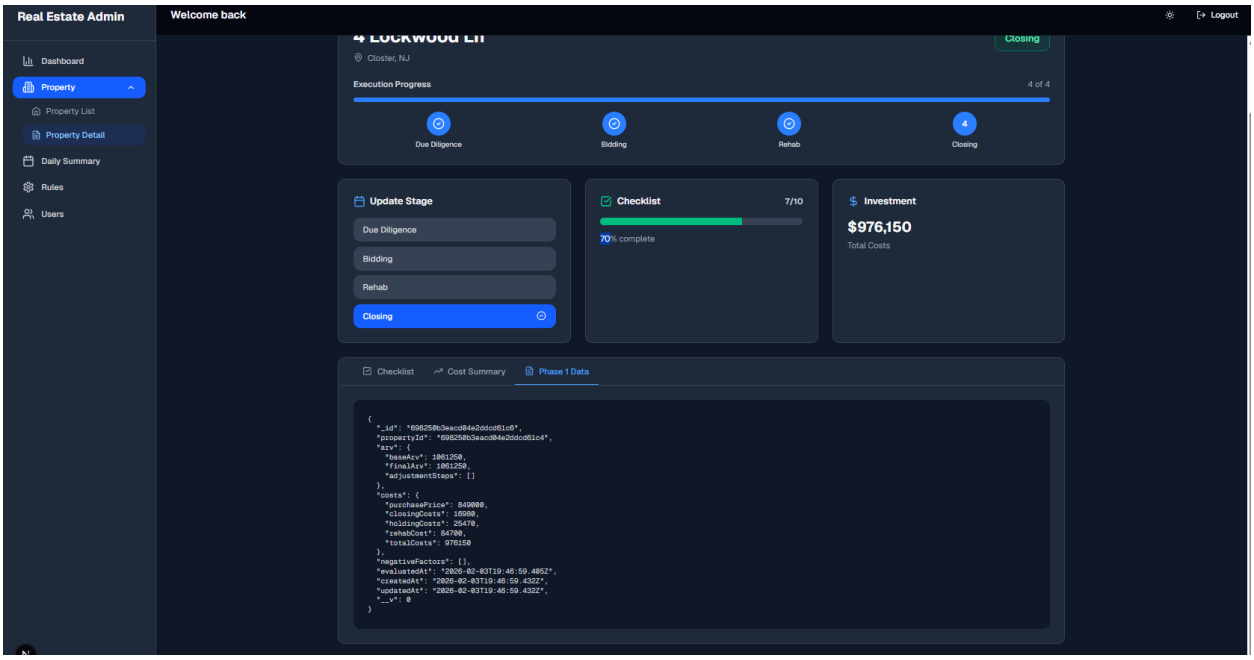
Description:

Full Phase 1 underwriting snapshot available for reference.

Key Points:

- Read-only JSON view
- Preserves original assumptions
- No execution changes affect Phase 1 data

Screenshot:



Milestone 1 Acceptance Confirmation

This delivery satisfies the following acceptance criteria:

- Approved deals transition cleanly into execution workspaces
- Execution stages are tracked per property
- Due diligence checklist is implemented and trackable
- Execution financials remain consistent with Phase 1 assumptions
- All actions require human input
- No automated legal, investor, or payment actions are present

Notes on Future Phases

- Contractor scopes, bids, and cost revisions will be introduced in **Milestone 2**
- Execution approvals and financial variance tracking will be handled in later phases
- Outputs from Phase 2 will feed Phase 3 automation
